

# Edge Counter Kits

The **Edge** modular counter system presents a unique opportunity to provide clients with full modular capabilities. **Edge** counters are constructed without joiners. They are connected frame-to-frame unless joiners are required for their configuration. All counter panels are single sided laminate except where the insides are visible. All posts are made of anodized aluminum and all trusses are raw aluminum. The **Edge** allows a counter that is personalized to a client's requirements to obtain the traditional look of a customized unit, but with all of the advantages that come with a modular system. The unique features of this system are: Tool-free assembly • Seamless finish • Free design & re-design service • Versatility • Extensive accessory range • Free setup instructions • Lifetime warranty on materials & workmanship • No hidden fees. *Note: listed prices are for hardware only. Graphics content (layout, printing & lamination) is extra. Transit cases are extra.*
