

IMAGESTAND 1

reddot design award
winner 2006

More Image. More Impact.

Use it once or use it for a long time.
This non-retractable banner stand gets great mileage in a POP or retail scenario. Its sleek fish-shaped foot is made of cast aluminum to give your message gravity. And its special lacquer finish makes it durable. A protective cylinder in the optional travel bag keeps your visuals clean. Put two or more together for a high-impact presentation. This is the cost-effective solution that lets your images stand for themselves.
