

VARIO D10

ROLL-UP DISPLAY

Compact in size and quick and effective in use, this system enables graphic panels to be simply rolled out of the base unit within seconds, making it ideal for use at frequently changing venues. The display is complete with spotlight, which is housed in the base unit when being transported, all fitting into a practical carry bag. Available in two standard widths of 840 and 940 mm, multiple units can be joined by connectors to provide a back wall with large format graphics.

Example type: VA 9421 (one-sided), VA 9701

Spotlight VA 9701

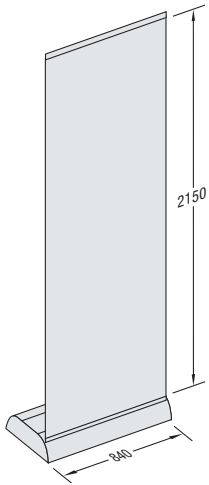

VA 9523 and VA 9524

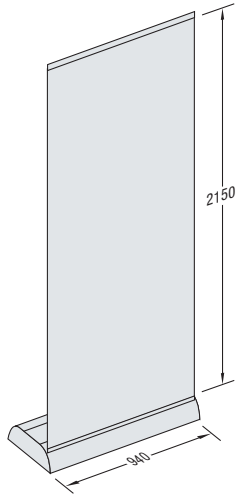

Light Attachment
