

Boost your sales with the most original air-pulsed solution!

A visual impact in just a few steps.

Light and compact the duo.bulbo is the perfect tool for mobile communication and effective marketing image.

The duo.bulbo is able to display a perfectly tight graphic that reaches as 3 meters in less than a minute.

Its round-shaped shell is rotomolded in order to protect the engine and the graphic during transportation.

Catch the attention with DENMAR's inflatable image carrier!

More than 6 square meters of graphic in a 40 cm case!

1. **duo.bulbo** is easy to carry: the top that protects the graphic also has a handle.
2. To set it up, remove the top by unlocking it and unfold the four arms to attach the graphic.
3. Put the graphic on the duo.bulbo by attaching the Velcro strips on the base then on the arms.
4. The arms increase the diameter of the graphic. Lock them.
5. Plug it in. The graphic inflates in less than a minute. You have got more than 6 square meters of printed graphic (2,2m height).
6. When the graphic is already set, you just have to remove the top of the rotomolded shell and plug in the duo.bulbo.

YOU DESERVE THE ORIGINAL!

duo.bulbo is compatible with different forms and sizes of graphic.
