

REVOLUTIONARY

Twister Showcase Display

Twister is a showcase and a communications medium rolled into one. Your product and your message & graphic can be displayed at the same time. In a tradeshow booth or a point of purchase application, this system is your solution for showing off your product.

Best of all, the system is very portable. Simply twist the unit upward using both hands and the unit is erected with one graceful movement. To pack, reverse the motion and the unit folds down into a small package.

The Twister comes in one diameter of 18" and in two heights, a 6 tier unit at 6.5' and a 7 tier unit at 8'.

The system comes with clear plastic shelves. An optional hardshell case with wheels will not only make transporting the Twister easier but will also protect your valuable investment.
